◇ Turn Your Strip Cut Shredder Into a Double Cut Shredding System ◇

AMS-PT HOPPER FED SHREDDERS Pierce & Tear Shredders

These hopper fed shredders can be used in conjunction with a strip cut shredder in order to produce a double cut that results in a smaller particle size.

The AMS-PT series shredders discharge onto a secondary shredder's in-feed conveyor and function as a pre-shredder in this application.

Shown at right, with an AMS-4000 industrial paper shredder, this double cut system will produce a nominal 5/8" x 1-1/2" particle size. Additional sizes are available.

Standard Features:

- Space saving versatility
- Turns an existing strip cut shredder into a double cut system
- Both shredders run independently for optimum functionality
