

AMS-1000 PAPER SHREDDER

- ★ 10 and 15 Horsepower Units
- ★ Realistic Throughput
- ★ From 1000 to 1500 lbs. per Hour
- ★ A-2 Tool Steel Cutters
- ★ Positive Overload Protection
- ★ Complete Shredder Systems

**American made
with Pride!**

AMS-1000 Offers:

- ★ High Volume Document Destruction
- ★ Mobile Document Destruction
- ★ 1 Year Warranty
- ★ Warranty Extensions Available
- ★ Easy Access Lift-Off Panels

AMS-1000 PAPER SHREDDER

Ameri-Shred offers its AMS-1000 Conveyor-Fed Industrial Paper Shredder with the standard 10 hp or 15 hp upgrade. These units have features of our larger series in a compact design. These powerful units are designed for high volume, centralized shredding and mobile document destruction. The AMS-1000 can be matched to balers, both horizontal and downstroke.

Dimensions - The AMS-1000 has a frame size of 54 13/16 in. high x 50 3/8 in. wide x 67 1/4 in. long with a 43 in. long infeed conveyor.

Cutters - Precision ground, A-2 tool steel cutters have positive saw-tooth grip. This high grade alloy is known for its durability and its ability to hold a cutting edge. These cutters will easily shred mylar microfilm, microfiche, large and small paper clips, staples, credit cards and Acco fasteners without harm to the cutters. The AMS-1000 has adjustable wear pads to adjust the cutter head after 2 to 3 years to maintain tolerances and the ability to shred a single check.

Shred Width - The AMS-1000 Industrial Paper Shredder can shred up to 16 in. wide paper into 5/16 in. wide strips. Other shred widths are also available.

Positive Overload Protection - A current sensing relay automatically shuts the shredder down in case of a jam and a push-button reversing starter allows the operator to clear jams instantly and resume shredding.

Capacity

AMS-1000 PAPER SHREDDER							
Model Number	Throat Opening	Shred Width	Capacity (sheets)	Horse Power	Conveyor Speed (fpm)	Pounds per Hr. (Field Average)	Pounds per Hr. (Cont. Theoretical)
AMS-1000	16"	5/16"	150 to 180	10	65	1000 to 1200	1 to 1.5 tons
AMS-1000/15	16"	5/16"	150 to 200	15	94	1000 to 1500	1 to 2 tons

Field Average - The paper volume actually processed in the field by Ameri-Shred equipment users and reflects what can be reasonably expected in a production environment.

Continuous Theoretical - Determined by presuming the machine would be running at a rated speed and all drive components would be loaded to their full load rating. This, of course, is not very realistic. Continuous theoretical capacities are presented here for comparison with other brand shredders, since many manufacturers use theoretical ratings in their advertising.

Warranty - This model is warranted against defects for one year. Ameri-Shred's nationwide service network is ready to respond with LOCAL SERVICE should you ever have a problem.

Shredding System Components - Ameri-Shred offers a complete line of system components to meet your demanding production requirements. Components available include attached output conveyors, stand alone output conveyors, balers, tippers, feed tables, security containers, shredder bags and cutter head lubricant.

Precision ground, A-2 tool steel cutters with positive saw-tooth grip will shred not only paper but corrugated boxes, credit cards, transparencies, microfilm, microfiche and floppy disks.

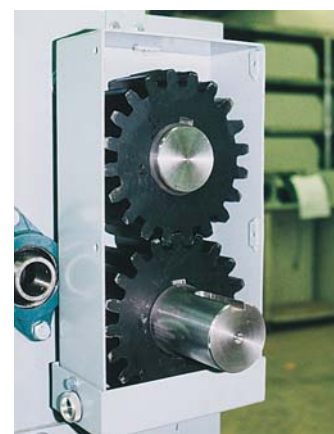

A 9" paddle wheel crusher, located just ahead of the cutters, enables this versatile machine to crush and shred wastebasket contents, corrugated boxes and even steel and aluminum beverage containers.

Hinged cover over the cutter assembly and lift off access panels allow for ease of cleaning and maintenance. Shredder bag with rack attaches directly to the shredder.

Heat treated spur gears provide an effective transfer of power to the cutters. Oil bath lubrication eliminates the need for manual greasing.
