

DOUBLE CUT SHREDDING SYSTEMS
Utilize two strip cut shredders

These double shred systems consist of a primary and a secondary shredder that are tailored to your specifications in terms of horsepower and shred width.

The primary shredder's cutting assembly is specifically designed to optimize throughput while the secondary shredder provides the security of a smaller cut.

These flexible systems can be created using Series 3, Series 4 or Series 5 shredders. A Series 5 industrial shredder with an in-ground paper metering system is shown at right.

Standard Features:

- Paper metering system optional
- Rugged, solid steel construction
- Auto lubrication available
- Metal detection system optional
- One year warranty on parts
